"The wave is coming"

The Fall From Grace presents its take on alternative music. The music flirts with diverse musical genres. The best way to classify the music may be as emotive alternative rock with strong references to post-hardcore.

The band is on solid ground within the Danish underground scene where it has been continuously proven that the members always deliver their absolute best performances at each show. This has among other things led to the nominee as Talent of the Year at the DMeA (Danish Metal Awards) as well as numerous concerts in Denmark and performances at the Motorschiff Stubnitz, a mobile platform for live music throughout Europe.

The band's live performances strive for delivering a unique auditive experience for the listener. This is delivered strictly without the use of sampling yet with a great portion of instrumental creativity and human sensibility.

The Fall From Grace is keen on new challenges. These ambitions coincide with the release of their new EP entitled The Largo Sessions which is self-produced. The acclaimed producer Christian Bonde, CB Studios (Dawn of Demise, Trusted Few, Crocell etc.), has then mixed the EP.

The songs focus upon being to the point and incorporate an experimental approach to the songwriting with a sense of melancholy and dream fullness.

The Largo Sessions EP is distributed worldwide through iTunes along with several other online music distributors.
